

10Tec hTooltip ActiveX Library

What's New

v1.10.83 | 2009-Oct-01

1. [Fixed] If your app uses visual styles and you clicked a control with an attached tooltip, the tooltip might be no longer displayed.
2. [Fixed] If you created a tooltip for a control which has a window handle using the **CreateForHwnd** or **CreateForVbCtrl** method and changed the size and/or position of the control later, the tooltip might be no longer displayed.
3. [Fixed] An on-demand tooltip might remain visible even after you closed the window which had the control the tooltip was attached to.
4. [Optimization] Internal optimization was done so the component uses fewer system resources now.

v1.10.80 | 2009-Mar-12

1. [New] Now hTooltip support Unicode in the tooltip texts on all Windows NT systems.
2. [New] You can change the font of the tooltip text with a new **Font** property. Setting this property to Nothing (the default value) causes the tooltip to use the default system font.

v1.0.75 | 2007-Jul-30

1. [Fixed] The previous builds of the hTooltip ActiveX DLL may cause some problems with launching your apps if the Data Execution Prevention (DEP) technology is turned on; especially this is true after you install some latest service packs for Windows 2003 which turn DEP on automatically. This build of hTooltip fixes this problem.

v1.0.72 | 2005-Jun-27

The first public release of hTooltip ActiveX DLL.
